The Pomodoro Technique - Why It Works & How To Do It

The Pomodoro Technique is a time management method for students, perfectionists, and procrastinators of all kinds. Work in focused, 25-minute intervals. Take a short break. Repeat.

Five Main Stages

There are a five key stages to getting the most utility out of the Pomodoro technique that you can:

1. Planning
2. Tracking
3. Recording
4. Processing
5. Visualizing

TEAMATO Pomodoro Timer

Restart

End of Session

Please note this button erases all
progress! Only press when finished.

-----How to Use-----

- A Pomodoro = 25 minute work session
- 5-Minute break after each Pomodoro
- 30-Minute break after 4 Pomodoros
- During a Pomodoro, focus ONLY on your work
- You can check memes, use the bathroom, and snack during your breaks.

Flexibility in pomodoro end

As someone with a strict work schedule, I would like an app with interactivity to help me manage my time, while also aligning with my breaks

Control and analytics

As someone who believes in growing a little bit every day, I want something that helps me retrospect and hold myself accountable for how I spend my day

Automation, minimal interruption

As someone who constantly checks my phone, I want something that will keep my attention on my work and not on my notifications

Simplicity and user friendly for the non-tech savvy

As someone who doesn't use technology, I want an app that is user friendly and easy to use

Force user to be productive during his sessions, accountability in schedule

As someone who doesn't like to work all day, I want something that keeps me super productive so that I have to spend less time working and get more time to do other stuff.

As someone who likes to track things like bills, expenditures, etc. time is also a commodity, and keeping track of how much time I work throughout the day helps me to know how much of it I spend on doing actual work.

As someone who has trouble focusing, I find it very difficult to stick to a schedule or work with deadlines.

As someone who takes really long breaks, I want something that helps me stop goofing off and get back to work

As someone with many pockets of time scattered throughout the day, I want to find a way to track how I'm spending my pockets of time (minimally 25 mins or so) as well as spending them wisely

The Main Problem:

In the world, many individuals struggle with structured time management, keeping focus on important tasks, being held accountable for mistakes, and learning from past experiences.

Existing Subpar Solutions:

Many existing apps tend to have too many overly-complicated features, lack critical features that help analyze time management, or are inherently too distracting.

Solution:

Our solution aims to incorporate the Pomodoro Technique to the fullest, automating as much as possible to make it easy for the user, keeping it simple to avoid distracting the user, and providing clear analytics of both completions and mistakes to aid the user in learning better time management.

Tomato Timer

TomatoTimer is a flexible and easy to use online Pomodoro Technique Timer

- has pause buttons
- shows keyboard shortcuts, notifications, settings options at all times
- you choose your break times
- simple and plain UI
- requires reading a wall of text to understand pomodoro method
- adjustable audio

TomatoTimers - Custom Pomodoro Timer and To-do List

TomatoTimers is a Custom Pomodoro Timer featuring To-do List with animated Tomatoes to boost your productivity.

- simple ui
- lots of clutter below UI, including advertising mobile app
- visual tutorial on pomodoro method
- customizable timer

- iOS app
- customizable Pomodoro session, short break, and long break times
- dark mode option
- ability to change x in long break after x Pomodoro sessions
- has pause button
- Too involved in UI, ton of diff wallpapers, audio options, distracting backgrounds
- Statistics option

- web app
- customizable Pomodoro session, short break, and long break times
- dark mode (paid) option
- ability to change x in long break after x Pomodoro sessions
- has a task list, report for entire day
- notification interval, auto start next Pomodoro session
- has pause button
- Nice instruction manual (about app, pomodoro technique, how to use, importance)

An online Pomodoro Timer to boost your productivity

What's New in v1.0.0

The v1.0.0 release is a major update that brings many new features and improvements to the app. It includes a new dark mode, a task list, and a report for the entire day.

What's New in v0.9.0

The v0.9.0 release is a minor update that brings some new features and improvements to the app. It includes a new notification interval and an auto start next Pomodoro session.

What's New in v0.8.0

The v0.8.0 release is a minor update that brings some new features and improvements to the app. It includes a new pause button and a nice instruction manual.

Changelog

The changelog is a list of all the changes made to the app. It includes the version number, the date of the release, and a list of the changes.

1.0.0 (2020-10-10)
0.9.0 (2020-09-10)
0.8.0 (2020-08-10)
